FINAL YEAR PROJECTS

@ Projectwale.com

www.Projectwale.com
Tel: 900467813

JAVA
1. A Distributed Database Architecture for Global Roaming in Next-Generation Mobile Networks –
2. A Reputation Based Trust Model for Peer to Peer eCommerce Communities –
3. XTC Algorithm based Scalable Wireless AD-HOC Networking –
4. Mobile Banking Design & Implementation
5. Retrieving Files using Content Based Searching and displaying them in Carousel View –
6. Distributed Data mining in Credit Card Fraud Detection Analysis –
8. Java Productivity Aids to Track the Control Flow, Parsing, Control Flow & Log Reader
9. J2me Implementation of POP3 Client System / J2ME Mail Client Server Implementation / Mail Downloader Using J2ME
10. VOIP – Flexible & Efficient Voice Communicator, Voice Over IP
11. Authenticating Network Attached Storage
12. Elliptic Curve Cryptography based Threshold Cryptography (ECCTC) Implementation for MANET’S
13. Optimal Multicast Routing in ADHOC Networks With ADHOC Multicast Routing Protocol (AMRoute) –
15. Static Image Hand Gesture Recognition using Neural Networks
16. CAC – Connection Admission Control using ATM Networks Implementation
17. Distributed Component Router based Supply Chain Management System – SCM –
18. Intelli WAP System Implementation / WAP based information Retrieval System
19. Proxy Server - Design and Implementation
20. Public Key Validation for DNS Security Extensions – Domain Naming Server
21. E-Recruitment System - Dynamic Online Professional Recruitment & Management System
22. Secure Password-Based Protocol for Downloading a Private Key
23. Distributed Cache Updating for Dynamic Source Routing Protocol
25. Secure Optimal Cyclic Cryptographic System –
26. Multithreaded Peer to Peer Communication using Distributed Frameworks–
27. Building Intelligent Shopping Assistant using Data mining technique for Web Services –
28. Network Analyzer & Network Monitoring Tool using SNMP
29. Remote Computing using Thin Clients
30. VVoIP – Voice with Video Over IP Networks
31. Dynamic Character & Pattern Recognition using Neural Networks
32. Online Handwritten Script Recognition
33. Towards multi model interfaces for intrusion detection
34. Proxy Server - A Smart Sharing System with Fire wall Protection, Customized Firewall for internet security & inter-network traffic gateway –

35. Location Aided Routing in Mobile ADHOC Networks for Secured Routing –

36. Network Border Patrol for Congestion Collapse Preventing System –

37. Defect Tracking Tool - Enterprise Project and Defect Tracking System –

38. Digital Signature Verification using Artificial Neural Networks / Digital Signature Verification

39. Multi Router Traffic Monitor Implementation

40. Homogeneous Networks & Control Implementation

41. A/I Net A Network that Integrates ATM and IP

42. E–Secure Transaction – Design & Implementation –

43. Image Compression and Analysis with MSE & PSNR Technique

44. Crypt kit – A real time cryptographic system for security over the networks

45. Efficient Contiguous Data & Video Streamer with Buffer Management

46. Distributed Component Router Based CRM – Customer Relationship Management–

47. Network Traffic, Packet Analyzer and Sniffer

48. Digital Steganography: Hiding Data within Data
49. Integrated Development Environment using JSWING – IDE JSWING
50. ERP Application – integrated Enterprise Solutions with Strategic advantages
51. Grid information Retrieval System
52. Network Packer Sniffer Implementation
53. Online Issue Tracking - Project Management Solutions
54. E-HealthCare - Distributed HealthCare and A Strategic Management System
55. Data mining implementation for Credit Cards Application Processing System
56. Dynamic University Linking & Data integrity Maintenance
57. E-Sales Order Processing System
58. RTF to XML Converter
59. Material Forecasting and Management Solution
60. Effective & Efficient Freight Management System
61. XML (Extensible Markup Language) enabled SQL for Storing & Retrieving Data
62. XML Migration - Implementation for XML format from Database System
63. Shares & Stock Management system – Portfolio Manager Implementation
64. Online Task Management with fully featured intelli System
65. Vertical Market Information Providing System Implementation
66. Insertion of Links of navigation into the Web Pages
67. Inter Office Messaging System – IOMS, Office Automation System
68. Web based Matrimonial Services, A Desi Matrimony web Portal

69. Online Auction & Bidding System With Multi Brand & Product Selection

70. Online Body Shopping System with Auto Mailing feature

71. Online Job Consultancy Services

72. Net Banking Services & Solutions

73. Online Web Shop Mall - Web Shop Site

74. Intelli Shopping Cart & Assistant System

75. Online VRS - Vehicle Reservation System

76. Distributed Web Service for On-Line Coursework Submission

77. Document Archival Management System – Electronic Archival Design

78. Remote Electricity Billing System Automation & Implementation – EJB

79. Dynamic College information System & Data integrity Maintenance

80. Computerized system for Extracting Abstract from the given source document, Abstract solutions

81. eCareer & Consultancy Service Online

82. eGovernance Design & Implementation System

83. EAI Approach – Implementation of EAI in Hotel Management System

84. Online Event Management with featured intelli system

85. Online Hospital info System with interactive Services & Universal Medical Portal with Adviser
86. Human Resource Management Solutions (HRMS)
87. Online Web based Complete Recruitment System
88. Distributed Database System for online Shopping & Store
89. Web based Distributor Information Providing Services
90. Insurance System, Online Insurance Solutions Provider
91. Integrating Data and Voice Networks - VoIP
92. Asynchronous Transfer Mode (ATM) Networks & intelligent Packet Filtering to Avoid Traffic & Congestion
93. Adaptive Coding and Packet Rate for TCP - Friendly VoIP Flows
94. Mobile based Network Monitoring System
95. System to Mobile Communication
96. Video Transmission using SIP
97. Web based Chatting - Multi User Voice Chat
98. Network Traffic Anomaly Detector –
99. SIP - Session Initialization Protocol, Chatting
100. Monitoring & Managing the Clusters using JMX –
101. Mobile Agents in a Distributed Multimedia Database System – Approach
102. Peer-to-Peer implementation Multithreaded Technology with tuple space
103. Network Proctor & Action Coordinator - The Network Monitoring Daemon –
104. P2P (peer-to-peer networking) messaging system-using JXTA –
105. Secured Network manager
106. Performance Evaluation o RMI using Latency, Round Trip Time and Packets Per Unit time –
108. Voice Web Browser Implementation
109. Network Analyzer, Design & Implementation
110. Routing Simulator - An Efficient end to end Packet Delivery system
111. Remote Viewer – A Remote Desktop viewer for an Intranet Environment
112. Remote City Mapping Implementation using J2ME
113. Mobile Clients Support GUI Systems design
114. JAVA J2ME – Bluetooth based Application for PDA / Mobile Devices
115. Bluetooth equipped mobile phones to support synchronous interaction with public displays
116. Bluetooth based Mobile Phone Photo Browser
117. IMAP - Internet Mail Access Protocol using Internet Engineering Task Force
118. Online PDA – Primary Domain Controller System
119. Java Virtual Pad - RFB protocol based Desktop sharing exclusively or on request
120. Portable and Generic tool for Web Applications
121. Network Document Management & Versioning System
122. Dynamic Server Replication System
123. Instant Smart Messenger System
124. Multi Threaded implementation with Pull / Push Technology
125. Tool for Performance Profiling of Web Sites
126. Network Time Tracker system
127. Workflow based Complaint Management System
128. Project Scrutinizer – Efficient Project Tracking System
129. Project Tracking & It Portfolio Management System
130. JSP based Shopping Cart Implementation
131. ERP & CRM, An Effective implementation of ERP with CRM Solutions
133. Multi Language Mailing system – Design & implementation
134. uPortal – University Portal & Education Grid information Service Provider
AD HOC NETWORK BASED PROJECTS

1. Optimal Multicast Routing in ADHOC Networks With ADHOC Multicast Routing Protocol (AMRoute) –
2. XTC Algorithm based Scalable Wireless AD-HOC Networking –
4. Location Aided Routing in Mobile ADHOC Networks for Secured Routing –

J2ME PROJECTS

1. Mobile Banking Design & Implementation
2. Intelli WAP System Implementation / WAP based information Retrieval System
3. J2me Implementation of POP3 Client System / J2ME Mail Client Server Implementation / Mail Downloader Using J2ME
4. Remote City Mapping Implementation using J2ME
5. Mobile Clients Support GUI Systems design
6. JAVA J2ME – Bluetooth based Application for PDA / Mobile Devices
7. Bluetooth equipped mobile phones to support synchronous interaction with public displays
8. Bluetooth based Mobile Phone Photo Browser
9. Mobile Info Service Provider – Online Data & information Access System
IMAGE PROCESSING PROJECTS
1. Digital Image Processing with Multi Domain Approach –
2. Static Image Hand Gesture Recognition using Neural Networks
3. Digital Signature Verification using Artificial Neural Networks
4. Dynamic Character & Pattern Recognition using Neural Networks
5. Image Compression and Analysis with MSE & PSNR Technique –
6. Online Handwritten Script Recognition –

COMMUNICATION PROJECTS
1. System to Mobile Communication
2. Video Transmission using SIP
3. Efficient Contiguous Data & Video Streamer with Buffer Management
4. Web based Chatting – Multi User Voice Chat
5. SIP - Session Initialization Protocol, Chatting
6. VOIP – Flexible & Efficient Voice Communicator, Voice Over IP
7. VVoIP – Voice with Video Over IP Networks

SECURITY PROJECTS
1. Elliptic Curve Cryptography based Threshold Cryptography (ECCTC) Implementation for MANET’S
2. Crypt kit – A real time cryptographic system for security over the networks
3. Secure Optimal Cyclic Cryptographic System
4. JSAFE - Rijndael Algorithm based Encryption & Decryption
5. Secured Network manager
7. Fire wall - Customized Firewall for internet security & inter-network traffic gateway
8. Secure Password-Based Protocol for Downloading a Private Key

NETWORKING PROJECTS

1. A Distributed Database Architecture for Global Roaming in Next-Generation Mobile Networks –
2. Adaptive Coding and Packet Rate for TCP - Friendly VoIP Flows
3. Asynchronous Transfer Mode (ATM) Networks & intelligent Packet Filtering to Avoid Traffic & Congestion
4. Authenticating Network Attached Storage
5. CAC – Connection Admission Control using ATM Networks Implementation
7. Efficient Contiguous Data & Video Streamer with Buffer Management
8. Dynamic Server Replication System
9. Mobile based Network Monitoring System
10. Monitoring & Managing the Clusters using JMX –
11. Multi Router Traffic Monitor Implementation
12. Grid information Retrieval System
13. Homogeneous Networks & Control Implementation
14. Location Aided Routing in Mobile ADHOC Networks for Secured Routing –
15. Mobile Agents in a Distributed Multimedia Database System – Approach
16. Multithreaded Peer to Peer Communication using Distributed Frameworks
17. Network Analyzer & Network Monitoring Tool using SNMP
18. Network Border Patrol for Congestion Collapse Preventing System
19. Network Packer Sniffer Implementation
22. Network Traffic Anomaly Detector –
23. Network Traffic, Packet Analyzer and Sniffer
24. Optimal Multicast Routing in ADHOC Networks With ADHOC Multicast Routing Protocol (AMRoute) –
25. P2P (peer-to-peer networking) messaging system-using JXTA –
26. Peer-to-Peer implementation Multithreaded Technology with tuple space
27. Performance Evaluation of RMI - Latency, Round Trip Time & Packets Per Unit time –
28. Public Key Validation for DNS Security Extensions – Domain Naming Server
29. Remote Computing using Thin Clients
30. Retrieving Files using Content Based Searching and Displaying them in Carousel View
31. Routing Simulator - An Efficient end to end Packet Delivery system
32. Secured Network manager
33. VOIP – Flexible & Efficient Voice Communicator, Voice Over IP
34. XTC Algorithm based Scalable Wireless AD-HOC Networking –
35. Modern English Spell Checking tool Design & Implementation
36. Web Based Bug Tracking System Implementation
37. E-Mail & SMS Assistant – Design & Implementation
38. Mobile Agent Software for Payroll Processing System
39. J2EE based Quick Car Rental Services Implementation
40. Application Installer
41. Online ATM Banking & online transactions
42. On-Line Book store with online Shopping cart
43. Proxy Server - TransProxy
44. Career tracer - communicator between job seekers and job providers
45. J Chat – A Chatting System over the Internet or local networks
46. Client FTP Frame
47. Online Airline Reservation Web portal for Traveling service provider
   Computer Resource Management System (CRMS)
48. Content management systems (CMS) for University & Education portal
49. Credit card system - web-based system facilitates on line operations
50. Control System for the Maintenance of Computers
51. Web based Customer Support System
52. Distributed Channel Management System
53. Digital Signatures System Design & Implementation
54. Distance Learning System Implementation
55. Online E Banking provides online transactions
56. E-Boutique - web portal design and implementation
57. eSearch - Web based search engine
58. Employee Training Tracking System
59. E-Learning - web portal design and implementation
60. E-Music web-based design system provides online Music
61. Web Enabled Automated Manufacturing System - WEAMS
62. Fire wall - Customized Firewall for internet security & inter-network traffic gateway
63. File Transfer Protocol - FTP Implementation
64. Hospital Management system
65. HR Consultancy and Applicant Database Management with XML
66. Intranet Mailing System design and implementation
67. Issue tracking System with Bug Tracking, Help Desk Ticketing & Solutions
68. Web based Online Library System
69. Web based Online Book Store
70. Jobs.com – A Service Provider for Employer & Employee
71. JChart for complex business & scientific charts
72. JSAFE - Rijndael Algorithm based Encryption & Decryption
73. Loyalty Business Tracker Application System
74. Mobile Clients Support GUI Systems design
75. Net Banking Services Design & Implementation
76. Net Conference Design & Implementation
77. Design & Implementation of Online Bidding & Auction
78. Online Resume Mart System Design
79. Online Tutorials - global forum for educators and students
80. JEDITOR - Customized Java Editor
81. eTutor - Online Tutorial, revolutionizing the tutoring industry
82. Pharmaceutical Distribution Automation Software system
83. Remote Desktop Capture system
84. eSearch - A Search Engine Design & Implementation
85. SMTP based JAVA MAIL CLIENT Graphical User Interface system
86. Java based Spam Filter implementation
87. Telecom Inventory maintenance and services Application with error tracking
88. Project based Time & efforts Tracking System Implementation
89. Training Organization Management System Implementation
90. Web Testing Tool Application - Designed to test & measure performance
91. Web based Job Site Management system – A Exclusive Job Portal with Mega features
92. Employee Profile Management System – An Effective Employee Management Resource
93. Development of Web enabled Online, Dynamic ATM Card Management System
94. Time Synchronization system using java
95. ATM Card & CMS application Back Office Management
96. Honey Pots – A Security System to Identify Black Hat Community in the Networks
97. Intranet Transformation of Voice with Data using Voice Over Internet Protocol (VOIP)
98. Bandwidth Congestion Control using Authentication Service for Automatic and Dynamic Reconfiguration System
99. Network Load Balancing and Redistribution of the Traffic Over the Networks using Grid Computing System
100. Media Streaming in Mobile using J2ME Toolkit
101. Efficient Network Routing Protocol with Effective Data Transfer without Packet Loss Over the ADHOC Networks
102. Data Communication and File Transferring using Decreased Latency and Block Tracker
103. Authentication of Digital Images by Encryption and Decryption with Primary Key Implementation using LSB Algorithm and Steganography
104. Efficient Monitoring, Managing, Detection of Networks & its Components using SNMP Protocol
105. Implementation of Security Kernel and Firewall using Java
106. Media streaming using J2ME
107. Unified Interface for Multiple Naming Service using JNDI
108. Multiplex SMS relay over GSM using AT commands
109. Zero Installation of Client DB Driver using RPC
110. Integrated Data Persistence & Synchronization in PDA’s
111. Distributed Cache Updating for the Dynamic Source Routing Protocol
112. Distributed Collaborative Key Agreement & Authentication Protocol for Dynamic Peer Groups
113. An Agent-Based Testing for Web Application
114. TCP-LP: Low Priority Service via End-Point Congestion Control
115. On Self-Fish Routing in Internet Like Environments

1. Schema based Enterprise Charting & Reporting for Desktops
2. ER – Schema Analyzer with Data Streaming
3. Data Hiding in Audio Files with PBE Encryption
4. Duplex Messaging for Enterprise Systems
5. Integrated Mail Transfer Agents using JAF
6. Designing Test Automation System using Native System Input Events
7. Components Framework for Developer Network using MVC Pattern
8. Asynchronous Server Interaction using AJAX and XML
9. A Divide-and-Conquer Strategy for Thwarting Distributed Denial-of-Service Attacks
10. An Adaptive Virtual Queue (AVQ) Algorithm for Active Queue Management
11. An Anti-phishing Strategy Based on Visual Similarity Assessment
12. News Feed Syndication Generation over Heterogeneous Networks
13. Enterprise Mailing System validation with DNS query using MX Records
14. Component based Architecture for WAP Compliant Transactional Services
15. On Demand Audio / Video Streaming and rendering Over IP using UDP
16. Proactive Port Scanning for Secure Computing Environment
17. DDE Thin Client Midlet for Limited Devices using Java Communication
18. Denial of Service against the Domain Name System
19. Digital Rights Management (DRM) using SOAP
20. Multithreaded Networked Data Injector & Extraction Server & Client for Cryptographic Services
21. An Identity-Free and On-Demand Routing Scheme against Anonymity Threats in Mobile Ad Hoc Networks
22. An SSL Back-End Forwarding Scheme in Cluster-Based Web Servers
23. Anteater-A Service Oriented Architecture for High Performance Data Mining
24. Constructing Inter-Domain Packet Filters to Control IP Spoofing Based on BGP Updates
27. Defending Against Distributed Denial-of-Service Attacks With Max-Min Fair Server
28. Distributed Token Circulation in Mobile Ad Hoc Networks
29. Versioning Control System using JAVA
30. Virtual Private Network using JAVA
31. Voice based XML Phone Survey System
32. VSAT Simulation and Smart Cache Loader
33. WAP based information Retrieval System
34. WAP based Route Tracing and Mailing
35. WAP Enabled Greeting Card System - WAP Enabled Device User to send greeting card to other WAP Enabled Devices
36. Web Enabled Supply Chain Management
37. Wireless Application Programming with J2ME and Bluetooth
38. Workflow based Complaint Management System
39. XML Parser for E-Mail Resumes / Resume Tracking & allotment using XML
116. Instant Messaging and Presence Technology for College Campuses
117. Intrusion Detection in Wireless Ad-hoc Network
118. Exponential-RED: A Stabilizing AQM Scheme for Low- and High-Speed TCP Protocols
119. Fine Grained Layered Multicast using STAIR
120. Logarithmic Store-Carry-Forward Routing in Mobile Ad Hoc Networks
121. Network-Wide Prediction of BGP Routes
122. NIRA: A New Inter-Domain Routing Architecture
123. Online Detection and Prevention of Phishing Attacks
124. OPHMR: An Optimized Polymorphic Hybrid Multicast Routing Protocol for MANET
125. A Natural Language-Based Interface for Querying a Video Database
126. A Route Reconstruction Method Based on Support Group Concept for Mobile Ad hoc Networks
127. A Secure Routing Protocol for mobile Ad-hoc Network
128. A Trustworthy Mobile Agent Infrastructure for Network Management
129. A wireless distributed intrusion detection system and a new attack model
130. Allocating Applications in Distributed Computing using JINI
131. An Acknowledgment-Based Approach for the Detection of Routing Misbehavior in MANETs
132. Routing and Security in Mobile Ad Hoc Networks
133. Scripting JAX-WS
134. Simple a Pre-Provisioning Scheme to Enable Fast Restoration
135. Site-based Mapping for parallel proxy servers with fewer TCP connections
137. Watermark Based Digital Rights Management
138. A Semantic Web-Based Approach to Knowledge Management for Grid Applications
139. A Software Implementation of a Genetic Algorithm Based Approach to Network Intrusion Detection
140. Context Oriented Search Engine with Web Crawler
141. Converting RTF into XML using the TEI Lite DTD
142. CRM based Sales of Fleet & Services Management
143. Data and Video Streaming System
144. Data Encryption and Compression System with Optimization
145. Dealership Management System - Dealers information & Dealings Process Manager
146. Defect Tracking Tool - Enterprise Project and Defect Tracking System
147. Design & Development of a Distributed, Scalable File Sharing & Access System with Security
148. Digital Image Processing – Frequency Domain
149. Digital Water Marking for Video Piracy Detection
150. Distributed Database System for online Shopping & Store
151. Distributed File Sharing System for Peer to Peer Network
152. E-Commerce Shopping cart for B2B Implementation
153. EJB Implementation Of Distributed Online Stock Maintenance and Trading
154. Graphical Network Browser
155. Heterogeneous Networks Control and Implementation
156. Implementation of Diagnosis, Packet Capturing and Transaction Monitoring and Administration in IP Network
157. Optimizing the Execution of multiple data analysis queries on Parallel & Distributed Environments
158. Patient Keeper: Medical Application on mobile Phone
159. VPersonalized E-mail Management at Network Edges
160. pFusion: A P2P Architecture for Internet-Scale Content-Based Search and Retrieval
161. XML Data Stores: Emerging Practices
162. XTC: A Practical Topology Control Algorithm for Ad-Hoc Networks
163. Image File compression & Transmission across the Network by MDA (Message Digest Algorithm)
164. Remote File Consistency Inspector using SHA Algorithm in Mobile Agents
165. Media Gateway Control Protocol Network
166. Analyzing Network Traffic in order to Detect possible Intrusions by RED Algorithm
167. Route Reservation in Ad Hoc Wireless Networks
168. Pre Active Circulated Cache Updating using on Demand Routing Protocol
170. A Robust Spanning Tree Topology Doe Data Collection and Dissemination in Distributed Environments
171. An Acknowledgement Approach for the Detection of Routing Misbehavior in MANETS
172. A Fully Distributed Proactively Secure Threshold Multi signature Scheme
173. Hybrid Intrusion Detection with Weighted Signature Generation Over Anomalous Internet Episodes
174. A Hierarchical Modeling and Analysis for Grid Service Reliability
175. Secure Data Hiding and Extractions using BPCS
176. SLA-Driven Clustering of QOS Aware Application Servers
177. User Interface for Scalable Peer-to-Peer Look Up Service for Internet Telephony
178. Advanced Host Monitor Enterprise
179. Advanced instant Messenger & Message Broadcasting
180. Bug Tracking System - Comprehensive Bug Tracking & Change Management
181. Call Centre Management System
182. CALTOOL – Computer Aided Learning Tool
183. Cargo Tracking System Design & implementation
184. Complete email system with an email server and an email client
185. Image Compression and Decompression using Huffman’s
186. Image Manipulation for Face Recognition
187. Implementation of Broadcast Messaging System using Multi Threading
188. Asset Management Solution (AMS)
189. Implementation of Packet Filtering Firewall in Linux Systems
190. Implementation of Peer-to-Peer Communication System with a Centralized Name Server in Linux Network
191. Implementation of Secured & Encrypted Data Transmission over the Web
192. Implementation of Wireless Application Protocol Gateway in Mobile Network
193. Implementation of Wireless Communication Gateway for PC To Mobile Network Route using Internet Protocol
194. Integrated & Distributed Enterprise Resource Planning with Customer Relationship Management Support
195. Intelli Mobile Banking System Design & Implementation
196. Investigation and Analysis of Packets Transformation in an Ethernet Network System
197. Java Grid Using Grid Computing System
198. Java Network Flow Analyzer
199. Java Network Monitor / Java Network Browser
200. Java RMI-based application which manages load balancing on heterogeneous clusters
201. Java SMTP, POP, Web Email Server
202. Java-to-XML Data Binding tool
203. Job Portal Implementation with intelli power features
204. JSP - Personal information Manager
205. Logistics - freight forwarding software solution logistics
206. Multimedia Messaging Service - MMS
207. Multiplex & Demultiplex Conversion in Audio / Video Transcoding Systems
208. Net Monitoring and Management using SNMP
209. Network Administrators to Monitor VPN and SSL Connections
211. Neural Network based Character Pattern Identification System
212. On-Line Analytical Processing - Maintenance of Data collection & Reports
213. Online Auction with featured shopping cart
214. Online Enterprise Resources Planning – Web Enabled ERP implementation with Distributed Database system
